

„Preparation of Regional Plan with ten municipal plans for integrated waste management in the South-East planning region“

All ten municipalities in the South-East region have some form of organized service for solid waste management. Important to note is that services for waste management of municipal utilities are concentrated in municipal solid waste, which in accordance with all national programs, strategies and solutions indicate that waste management encompasses all types of waste created by: households, industry, construction waste, agricultural, medical waste.

According to the legislation on waste management the region is obligated to deliver ten-year Regional Plan for Waste Management, which will apply to all types of waste handling and cleanliness of waste collection, transportation and disposal of the waste.

The completed plans (regional and municipal) should be adopted by the Municipal Councils upon prior consent of the state authority for waste management.

Short description of the project:

Project leader:

- Centre for Development of the South-East Planning Region

Проектни партнери:

- Municipality of Bogdanci
- Municipality of Bosilovo
